

LIFTHOR MJÖLNIR

by Thor's Drone World

User's Manual

Mjølner (/ˈmjoʊlˌnɛr/)
In Norse mythology, Mjølner
is the hammer of Thor, the
Norse god associated with
thunder. Mjølner is portrayed
in Norse mythology as one
of the most powerful
weapons in existence.

Congratulations
on your new

LIFTTHOR
MJØLNIR

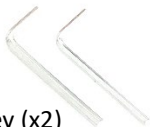

the Ultimate Tablet holder for
DJI Mavic Series

Content:

Aluminum body

Aluminum
ball joint

Hex Key (x2)

Tablet clamp
Compatible with 7.9" up to
13" devices

Support plate

How to assemble:

Remove the components from the box, use the bigger hex key provided to unscrew the ball joint

Using the bigger Hex key provided, secure the ball joint on the top hole of the aluminum body, make sure it is tightened hard.

With the smaller hex key provided, untighten the aluminum stopper from the underside of the body.

Slide the stopper all the way to the back to allow space for the RC to enter.

← Stopper

***Note:**

The body has 2 anti-slip pads to protect the RC from any scratches and keep it secure in place.

Prepare the RC by raising the antennas and extracting the arms all the way out

Gently lower the RC into the bay of the base with a slight inclination. You might feel some resistance while sliding the controller in place, due to the anti-slip pads.

Secure the RC in place by sliding the stopper towards the RC. Make sure the RC is center and align properly

Once everything is in place, secure the stopper from underneath the body, with the small Hex Key provided.

Unscrew the tightening ring from the back of the
Tablet Clamp and place it on the ball joint

tightening ring →

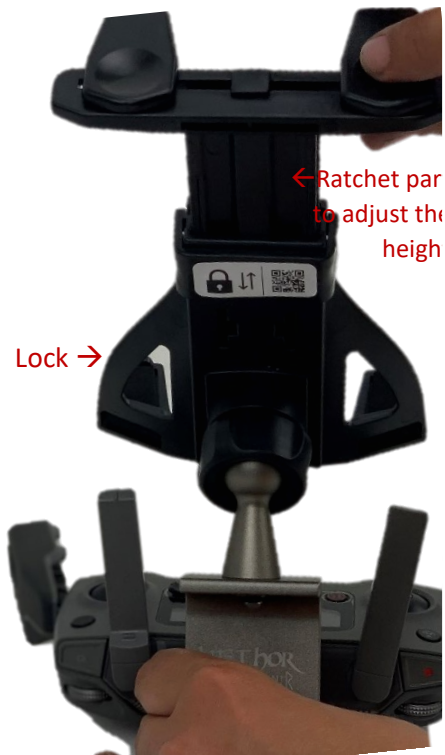

Attach the clamp to the ball joint and screw the ring back to secure the clamp position / angle.

The clamp has two mechanisms to ensure your tablet sit secure and in place.

The first mechanism is the ratchet part, to adjust to the size of your tablet. We recommend setting it a little smaller (1" / 2.5cm) than the actual size of the table for a tighter, secure fit.

Once you have selected the right height lock the ratchet in place by sliding the lock downwards.

Place the tablet in landscape mode by pulling the spring mechanism upwards and release it to secure the tablet in place. You can adjust the top clamp brackets, if needed, to avoid pressing on any buttons

*Scan the QR code
with your phone for a
video tutorial

Compatible with most small tablets like iPad Mini or similar up to larger tablets like the iPad Pro 12.9" and everything in between

Alternative setups:

With the
support plate
provided

With your
smart phone

With the
RC's arms
opened

With the
RC's arms
closed

Integrated tripod
mounting point
located underneath
the main body
